

The Khronos Group[®] is an open, member-driven industry consortium developing royalty-free standards, and vibrant ecosystems, to harness the power of silicon acceleration for demanding graphics rendering and computationally intensive applications. Khronos members are industry leaders from around the world that join to safely cooperate - both to advance their own businesses and the industry as a whole.

HIGH PERFORMANCE 3D GRAPHICS 	3D ASSET AUTHORING AND DELIVERY 	PORTABLE XR – VIRTUAL AND AUGMENTED REALITY 	PARALLEL COMPUTATION, VISION, MACHINE LEARNING AND INFERRING
SAFETY CRITICAL FORUM: Creating API design guidelines for markets requiring safety certification			KHRONOS[®] SAFETY CRITICAL ADVISORY FORUM

WHY SHOULD MY COMPANY BECOME A KHRONOS MEMBER?

Every industry needs effective open standards. If your company cares about high-performance rendering or compute, then Khronos membership gives you a voice in how the specifications that will fundamentally affect your business are created and evolved.

- Influence the design and direction of key open standards that will drive your business
- Network with domain experts from diverse companies in your industry
- Accelerate your time-to-market with early access to specification drafts
- Gain early insights into industry trends and directions
- A state-of-the-art IP Framework protects both your Intellectual Property and shipping implementations
- Enhance your company reputation as an industry leader through Khronos outreach activities

WHAT MEMBERSHIP LEVEL IS RIGHT FOR MY COMPANY?

Khronos has multiple levels of membership, to enable any company, large or small, to get involved. All Khronos members have access to any Working Group (WG) that is driving a standard that is relevant to their business.

PROMOTERS BY BOARD APPROVAL	CONTRIBUTORS ANY COMPANY	NON-PROFIT NON-PROFIT COMPANIES	ASSOCIATE UP TO 100 EMPLOYEES	ACADEMIC EDUCATORS
WG PARTICIPATION	WG PARTICIPATION	WG PARTICIPATION	WG PARTICIPATION	WG PARTICIPATION
WG VOTING RIGHTS	WG VOTING RIGHTS

IMPLEMENTING AND ADOPTING KHRONOS STANDARDS

Application developers may always freely use Khronos standard APIs when they are available on your target system. If your company is implementing a Khronos API, then Khronos provides an Adopter Program for each of its standards that provides a conformance test suite to help you test your implementation. There is typically a modest fee for access to an Adopter Program that covers an unlimited number of shipping products. Becoming an Adopter is independent of Khronos membership, though members often enjoy a significant Adopter Program discount.

Once your implementation officially passes Khronos conformance you may use the trademarked name and logo of the standard in association with your product and call your product conformant. This helps to ensure that Khronos standards are consistently implemented to create a reliable cross-vendor platform for developers. Conformant products also enjoy protection from the Khronos IP Framework, ensuring that Khronos members will not assert their IP essential to the specification against your implementation.

Learn more about becoming an Adopter and about the conformance process at [khronos.org/conformance](https://www.khronos.org/conformance)

KHRONOS MEMBERS AS OF MARCH 2020

BECOME A KHRONOS MEMBER OR ADOPTER

Become a Khronos Member to help define, develop, and evolve the open standards that are critical to your business and benefit the wider industry. Become a Khronos Adopter to gain IP and trademark protection for your conformant implementations of Khronos standards. **Visit us online at the links below to learn more.**
